Script for SOLHANA Assessment (Video 2)

Draft 1.2

Written by: Ashish Sethi

Medium: 2D Color Animation

Duration: 120 seconds (+-10 seconds for voice over)

ADVIDS

	Scenes	Narrative
1.	We show Clark sitting in his office browsing the SOLHANA website; we show his expressions to be “Impressed”.	The search for a service provider to plan, implement and operate SAP S/4HANA in the organization led Clark to SOLHANA.
2.	We cut the screen, where we show text on screen as SAP® R/3®, SAP® ECC and below it as SAP S/4HANA®. Data lines travelling between them in a smooth manner are shown, along with an hour glass on the side. This signifies how easy and quick the migration was with SOLHANA.	With the optimal expert guidance, SOLHANA made the entire migration process to SAP S/4 HANA an incredibly easy fare.
3.	The 5 assessment steps are shown as just the overview.	SOLHANA’s experts chalked out a 5 step assessment that determines the company’s unique conversion path to S/4 HANA. . Starting with
4.	We zoom into the icon (circle) of the first step and show a high level meeting in a conference room (same as the previous video) BUT along with an Expert from SOLHANA, he’s seen giving a PPT and explaining everyone. NOTE: We show each assessment step as text on screen (the title of the particular frame) and the time period that each step take, as mentioned in the documents provided.	The kick-off meeting, where SOLHANA experts explain the assessment process to him and the other directors, IT- and SAP-specialists in detail.
5.	We pan the screen, here we show the company’s important person (another character) holding a presentation where on the board the following text is written: - Current SAP® landscape - Modifications to SAP® landscape	Next, the SOLHANA experts hold an Intensive workshop to understand the organization’s current situation and the requirements for S/4HANA across the following dimensions; • How does the organization’s current SAP landscape look like? • The history of recent adjustments that were made to the current SAP. • What are the organization’s required specifications on S/4HANA?

ADVIDS

	Infrastructure requirements for S/4HANA® are mentioned related to the narrative as provided and SOLHANA experts are seen taking down notes in the laptops.	
6.	The SOLHANA experts are seen brainstorming and illustrating an architecture design. (in a different office setting).	In the third step of the Assessment, the SOLHANA experts elaborate up to three possible architecture designs of the future SAP® landscape.
7.	The SOLHANA experts are seen making a plan, with regular intervals of thinking. While we show them thinking, we show icons of a Calendar, clock, milestone appear in the frame.	Once done, SOLHANA develops a high-level plan with milestones and approximate dates for the migration to help the organization conveniently plan the transition to SAP S/4HANA in terms of invested time and objectives.
8.	We see mapping of each of the option mentioned in the narrative (SAP S/4HANA® Readiness Check with a loading icon of 65%; architecture design proposals with a design panning out, conversion path options as a flowchart, and a roadmap to SAP S/4HANA® an arrow leading towards S/4HANA®) with respective icons and the last icon is shown as SUCCESS. We zoom out such that, this entire thing was happening in a report placed on the company's presidents table.	The assessment concludes with a presentation of results of the previous sessions, including the SAP S/4HANA readiness check, architecture design proposals and a roadmap to SAP S/4HANA. These results are presented to the organization's management and handed in as a report, which in turn serves as basis for the management to decide on the way to move forward.
9.	We show the President, Clark and directors, shaking hands with SOLHANA experts	Satisfied with the intricately detailed process adopted by SOLHANA Clark's organization got onboard on the journey to revolutionalize their current landscape of SAP by migrating to S/4 HANA.
10.	We zoom out from the frame to show a top view of Clark's organization and see many such organizations (multiplying in motion). SOLHANA is shown on top with	Like Clark and several others, you too can get onboard and migrate to S/4 HANA in a seamless way.
