Voice Over Narrative

With your company's growth, the data related to your core departments also grows substantially.

Managing this data through siloed systems is ineffective.

Microsoft Dynamics 365 for Customer Engagement is a sophisticated management solution that digitally transforms your business through a suite of connected intelligent applications.

Solution applications for Sales, Marketing, Customer Service, Field Service, and Project Service work together so you can access data in one system and deliver a unified customer experience from initial contact through the sales process into service and support.

With Dynamics 365:

- You can combine your sales and marketing operations
- Personalize your customer experience
- Gather insights for effective engagement and service
- Optimize your resources and dispatch the right technician with improved scheduling,
- Confidently manage projects and empower your service professionals to deliver best through collaborative tools.
- And gain access to your CRM data from the cloud to transform and accelerate your business growth.

Get started with Microsoft Dynamics 365 today with the help of an experienced partner, MCA Connect!

	Scene Description	Voice Over Narrative
1	(Minimal details, simple and professional styles to be followed) We start with a visual of a company growing. From this company, we see illustration of graphs relating to sales, insights relating to marketing, mails/ requests relating to marketing field, demands field and project service appear on the screen. Each of the illustration gets superimposed on the previous one (to show the increasing and cluttered data)	With your company's growth, the data related to your core departments also grows substantially.
2	This combine cluttered illustration opens up and we see an illustration of a PC in a silo with loads of files (Paper work) placed next to it. We show a red exclamation appearing from the PC and see it flashing on the screen, behind this; we see a graph depicting declining company growth.	Managing this data through siloed systems is ineffective.
3	We see the line on the graph above covert in to a horizontal ECG line.	

	We then proceed to show this line coming to life and see it forming the Microsoft Dynamics 365 logo, with supporting secondary illustration of digital transformation in the background.	Microsoft Dynamics 365 for Customer Engagement is a sophisticated management solution that digitally transforms your business through a suite of connected intelligent applications.
4	The Dynamics 365 in the above illustration is presented in the centre of the screen as the connecting element to various blocks which includes: Sales, Marketing, Customer Service, Field Service, and Project Service. We show the data (energy lines) moving from the centre block to all the above blocks and see them flipping into forming an illustration of “Unified and Happy Customer Experience” as a flash.	Solution applications for Sales, Marketing, Customer Service, Field Service, and Project Service work together so you can access data in one system and deliver a unified customer experience from initial contact through the sales process into service and support.
5	We zoom out to highlight the blocks for Sales, Marketing and Customer Service and see the screenshot animation for personalizing customer experience, in the background of a multiplying illustration of customers with a smile, and likes (thumbs up) icons emerge from the customers.	With Dynamics 365: • You can combine your sales and marketing operations • Personalize your customer experience

6	We cut to see a globe illustration on the screen; it rotates to and we see the animation of the screenshot regarding the insights.	• Gather insights for effective engagement and service
7	We proceed to show the block named as Field Service appear on the screen and see an illustration for graph of lowered operational cost emerge from it which transform to that of a hand shake in the backdrop of a customer's place to depict on-site service. (depicting success).	• Optimize your resources and dispatch the right technician with improved scheduling,
8	We cut to show the block of Project Service on the screen and show gears illustration on screen from which the typography/ icons of “Enhanced productivity”, “Customer Loyalty”, “Profits” emerge.	• Confidently manage projects and empower your service professionals to deliver best through collaborative tools.
9	We zoom out to show the illustration from scene 3 and see a cloud slide in at the centre of the screen, we see the cloud emitting a light (like from spaceship) and pickup all the blocks/ services. We see this cloud getting connected to the company and project the transfer of data. We proceed to show the same data being transferred to a tablet/ cell phone.	• And gain access to your CRM data from the cloud to transform and accelerate your business growth.
10	We have the logo, brand-name and contact information on screen.	Get started with Microsoft Dynamics 365 today with the help of an experienced partner, MCA Connect!
